**LOJACK HELPS LAS VEGAS POLICE & AUTO THEFT TASK FORCE BREAK UP  
TWO MOTORCYCLE THEFT RINGS IN LESS THAN 48 HOURS**

*10 Suspects Arrested; Four Honda CBR Motorcycles and Yamaha ATV Recovered*

Westwood, MA – June 17, 2008 — In less than 48 hours, LoJack Corporation's (NASDAQ: LOJN) LoJack For Motorcycles was instrumental in helping Las Vegas police and the Southern Nevada Auto Theft Task Force break up two theft rings June 14-16. The operations led to the recovery of four Honda CBR motorcycles, a Yamaha ATV and the arrest of 10 suspects. The LoJack Stolen Vehicle Recovery System once again proved its effectiveness in recovering stolen assets and helped police apprehend the criminals behind these crimes.

“Motorcycle riders need to do everything in their power to protect their valuable assets, because professional thieves can steal a bike right out of your garage and hide it in theirs,” said Patrick Clancy, Vice President of Law Enforcement, LoJack Corporation. “That’s why a recovery system like LoJack that uses Radio Frequency (RF) technology is so critical to install. These recent recoveries highlight the effectiveness of LoJack’s proven technology, which was able to lead law enforcement to the specific garages where the stolen bikes were located.”

**About the Recoveries:**

**LoJack-Equipped 2006 Honda CBR600 Motorcycle Leads Law Enforcement Officials to Chop Shop Operated by Known Street Gang Member**

In this recovery, a Las Vegas resident had left his garage door open and later discovered his 2006 Honda CBR600 motorcycle stolen. Once the LoJack Unit was activated, Las Vegas police and the Southern Nevada Auto Theft Task Force located the stolen bike in the garage of a known street gang member. After a search warrant was obtained, officers discovered the stolen Honda CBR600 equipped with the LoJack, along with a stolen 2001 Honda CBR900 inside the garage. Seven suspects were arrested on a variety of charges including “Operating a Chop Shop,” “Possession of Stolen Property” and “Grand Larceny Auto.”

### **Officials Bust Chop Shop and Arrest Three**

In this recovery, a Las Vegas resident discovered his motorcycle missing from his home shortly after midnight. He contacted the Las Vegas police and, later that morning, officers tracked the silent LoJack signal installed on the stolen 2006 Honda CBR600 to a residential garage located five miles away from where it had been stolen. Las Vegas police and the Southern Nevada Auto Theft Task Force acquired a search warrant and discovered the Honda CBR600 along with another stolen 2006 Honda CBR600. Fortunately, the officers arrived just as the suspects were preparing to strip one of the bikes. Three suspects were arrested for “Operating a Chop Shop,” “Possession of Stolen Property” and “Grand Larceny Auto.” A 2007 Yamaha ATV, which was reported stolen two days before, was also recovered without any known damage.

### ***About LoJack Corporation***

LoJack Corporation, the company that invented the stolen vehicle recovery market more than two decades ago, is the global leader in recovering valuable mobile assets. The company’s time-tested system is optimized for recovering stolen mobile assets through its proven Radio Frequency technology and unique integration with law enforcement agencies in the United States that use LoJack’s in-vehicle tracking equipment to recover cars, trucks, commercial vehicles, construction equipment and motorcycles. The company’s Stolen Vehicle Recovery System delivers a 90 percent success rate for cars and trucks and has helped recover more than \$4 billion in stolen LoJack-equipped assets worldwide. Today, LoJack operates in 26 states and the District of Columbia, and in more than 30 countries throughout North America, South America, Europe, Africa and Asia.
