**LOJACK PARTNERS WITH 20 AREA LAW ENFORCEMENT AGENCIES TO
HELP COMBAT AUTO THEFT IN THE GREATER PORTLAND
METROPOLITAN AREA**

***LoJack Stolen Vehicle Recovery System Offers Portland Area Residents Powerful
Vehicle Theft Protection Solution***

PORTLAND, OR – September 7, 2005 – The citizens of the greater Portland Metropolitan area can rest a little easier today knowing that LoJack Corporation's (NASDAQ: LOJN) Stolen Vehicle Recovery Systems are now available in the greater Portland metropolitan area. With a better than 90 percent recovery success rate, the LoJack system is a time-tested radio frequency-based theft protection solution. It is directly integrated into area law enforcement agencies that leverage the system to track and recover LoJack-equipped vehicles when they are reported stolen.

The availability of LoJack was announced officially here today at a press conference outside the Portland Police Bureau. Twenty regional and local law enforcement agencies will use the LoJack system to recover stolen vehicles. They include:

Beaverton Police Department, Canby Police Department, Clackamas County Sheriff's Office, Clark County Sheriff's Office, Fairview Police Department, Forest Grove Police Department, Gladstone Police Department, Gresham Police Department, Hillsboro Police Department, Milwaukie Police Department, Oregon City Police Department, Port of Portland Police, Portland Police Bureau, Tigard Police Department, Troutdale Police Department, Tualatin Police Department, U.S. Customs and Border Protection (Dept. of Homeland Security), Vancouver Police Department, Washington County Sheriff's Office and the Washington State Patrol. The State of Oregon Law Enforcement Data System (LEDS) will be integral to the communications process between law enforcement and LoJack.

-more-

At the press conference, John Raber, vice president, LoJack Corporation, discussed the critical partnership LoJack has established with multiple law enforcement agencies in the area, who together can offer a better level of vehicle theft protection to area residents.

“Auto theft continues to be a national issue and a growing problem in Oregon, with more than 19,000 vehicles stolen in this state each year, amounting to one vehicle stolen every 30 minutes. The Portland metro area accounts for more than two-thirds of vehicle theft in Oregon,” said Raber. “The joint effort we launched today marks a significant step toward helping combat vehicle theft in this area. All of these agencies have showed tremendous cooperation and have been instrumental in helping to bring this powerful solution to area residents.”

LoJack Police Tracking Computers Donation and Law Enforcement Support

LoJack has donated the infrastructure to connect its systems directly to the area’s law enforcement agencies, which includes the donation of LoJack Police Tracking Computers, which are installed in law enforcement vehicles to track and recover stolen vehicles. In addition, LoJack has on staff law enforcement liaisons (former police officers with an expertise in auto theft), who are based in the Portland area and will work to provide training and ongoing support to area law enforcement agencies in their use of the LoJack system.

How LoJack Works

The LoJack Stolen Vehicle Recovery System includes a small wireless radio-frequency transceiver that is hidden in a vehicle in one of 20 possible locations at the time of purchase. Once the vehicle is reported stolen to the police, state law enforcement computers match the vehicle identification number to the LoJack system. After the match, the LoJack system is automatically activated, emitting silent radio signals from a small radio transceiver. Law enforcement vehicles with LoJack technology follow these signals, which lead to the stolen vehicle.

The better than 90 percent recovery rate for vehicles equipped with LoJack has translated over the past 19 years into more than \$1.5 billion in recovered assets in the United States.

LoJack Availability

LoJack products are now available at participating automobile dealerships in the greater Portland region. The base LoJack Stolen Vehicle Recovery System retails for \$695 and the LoJack Early Warning System, which automatically notifies consumers if their vehicle is moved without permission, retails for \$995.

About LoJack Corporation

LoJack Corporation, the premier worldwide marketer of wireless tracking and recovery systems for valuable mobile assets, is the undisputed leader in global stolen vehicle recovery. Its Stolen Vehicle Recovery System delivers a better than 90% success rate and has helped recover more than \$3 billion in global assets. The system is uniquely integrated into law enforcement agencies in the United States that use LoJack's in-vehicle tracking equipment to recover stolen assets, including cars, trucks, commercial vehicles, construction equipment and motorcycles. LoJack operates in 23 states and the District of Columbia, representing areas of the country with the greatest population density, and highest number of new vehicle sales and incidence of vehicle theft. In addition, LoJack technology is utilized by law enforcement and security organizations in more than 25 countries throughout Europe, Africa, Latin America and Asia.
