**LOJACK PARTNERS WITH 26 AREA LAW ENFORCEMENT AGENCIES TO  
HELP COMBAT AUTO THEFT**

***LoJack Stolen Vehicle Recovery System Offers Area Residents Powerful Vehicle Theft  
Protection Solution***

RALEIGH, NC – December 15, 2005 – The citizens of Wake, Orange, Durham, Cumberland, Hoke, Johnston and Harnett counties can rest a little easier today knowing that LoJack Corporation's (NASDAQ: LOJN) Stolen Vehicle Recovery Systems are now available in the area. With a better than 90 percent recovery success rate, the LoJack system is a time-tested radio frequency-based theft protection solution. It is directly integrated into area law enforcement agencies that leverage the system to track and recover LoJack-equipped vehicles when they are reported stolen.

The availability of LoJack was announced officially here today at a press conference hosted by the Wake County Sheriff's Office at the North Carolina State Fair Grounds (J.S. Dorton Arena). Twenty-six regional and local law enforcement agencies will use the LoJack system to recover stolen vehicles. They include: Wake County Sheriff's Department, Orange County Sheriff's Department, Chapel Hill Police Department, Carrboro Police Department, Durham Police Department, Raleigh-Durham Airport Police, Morrisville Police Department, Apex Police Department, Garner Police Department, State Capital Police Department, Fuquay-Varina Police Department, Zebulon Police Department, Cary Police Department, Holly Springs Police Department, Raeford Police Department, Hoke County Sheriff's Department, Hope Springs Police Department, Fayetteville Police Department, Cumberland County Sheriff's Department, Fort Bragg Military Police, Smithfield Police Department, Clayton Police Department,

Selma Police Department, Harnett County Sheriff's Department, Dunn Police Department, and Lillington Police Department.

At the press conference, Peter Conner, Vice President of Government Relations, LoJack Corporation, discussed the critical partnership LoJack has established with multiple law enforcement agencies in the area, who together can offer a better level of vehicle theft protection to area residents.

“Auto theft continues to be a national issue and a growing problem in North Carolina, with more than 26,000 vehicles stolen in this state each year, amounting to eighty vehicle thefts per day,” said Conner. “The joint effort we launched today marks a significant step toward helping combat vehicle theft in this area. All of these agencies have showed tremendous cooperation and have been instrumental in helping to bring this powerful solution to area residents.”

#### ***LoJack Police Tracking Computers Donation and Law Enforcement Support***

LoJack has donated the infrastructure to connect its systems directly to the area's law enforcement agencies, which includes the donation of LoJack Police Tracking Computers that are installed in law enforcement vehicles to track and recover stolen vehicles. In addition, LoJack has more than thirty law enforcement liaisons (former police officers with an expertise in auto theft) on staff, who will work to provide training and ongoing support to area law enforcement agencies in their use of the LoJack system.

#### ***How LoJack Works***

The LoJack Stolen Vehicle Recovery System includes a small wireless radio-frequency transceiver that is hidden in a vehicle in one of 20 possible locations at the time of purchase. Once the vehicle is reported stolen to the police, state law enforcement computers match the vehicle identification number to the LoJack system. After the match, the LoJack system is automatically activated, emitting silent radio signals from a small radio transceiver. Law enforcement vehicles with LoJack technology follow these signals, which lead to the stolen vehicle.

The better than 90 percent recovery rate for vehicles equipped with LoJack has translated over the past 19 years into more than \$1.5 billion in recovered assets in the United States.

### ***LoJack Availability***

LoJack products are now available at participating automobile dealerships. The base LoJack Stolen Vehicle Recovery System retails for \$695 and the LoJack Early Warning System, which automatically notifies consumers if their vehicle is moved without permission, retails for \$995.

### ***About LoJack Corporation***

LoJack Corporation, the company that invented and is the undisputed leader in the global stolen vehicle recovery market, leverages its superior technology, direct connection with law enforcement and proven processes to be the global leader in tracking and recovering valuable mobile assets. The company's Stolen Vehicle Recovery System delivers a better than 90% success rate in tracking and recovering stolen cars and trucks and has helped recover more than \$3 billion in global assets. The system is uniquely integrated into law enforcement agencies in the United States that use LoJack's in-vehicle tracking equipment to recover stolen assets, including cars, trucks, commercial vehicles, construction equipment and motorcycles. Today LoJack operates in 24 states and the District of Columbia, and in more than 25 countries throughout Europe, Africa, Latin America and Asia.
