SMART TRACKING FOR YOUR FLEET VEHICLES

LO JACK FLEET MANAGEMENT POWERED BY TOMTOM®

LoJack[™] Fleet Management Powered by TomTom features a vehicle tracking device that enables a smarter, more secure fleet for your business.

How it Works

- •The vehicle tracking device can be self-installed or installed by LoJack for FREE
- •Once activated, you can access your fleet's driving and vehicle information online via a map, dashboard or through a comprehensive set of reports

Key Features

- Analyze working hours, fuel cost and levels, detect idling and driving performance
- Increase driver safety and simplify working time registration for drivers and co-drivers

- Provide customers with reliable arrival time information
- Generate automated reports on arrival times, time spent on the road, routes driven and more
